

RangeMe Sample Shipping Instructions

Print out this page and follow the instructions before shipping out samples to buyers. The bottom half of this print out is a set of instructions for you to include in your sample shipment.

1. Cut out the label between the dashed lines and tape it to the top of your sample shipment.
2. In the instructions section, write down your company name, brand name and product names in the spaces provided. Make sure to perfectly match the spelling used in the instructions with your RangeMe brand page.
3. Place the instructions inside the package to encourage buyers to follow up and review your brand and products.

Thank you for taking the time to review the enclosed samples.

Here is how you can provide feedback on these samples and review my profile again for more information.

1. Check under your **Messages**.

When on RangeMe, click on Messages in the top menu. You can find our conversation under our:

Company Name

Brand Name

Product Names

2. Check under your **Interested** folder

From your Dashboard, click on “Interested” to see all brands and products you’ve requested samples from and expressed interest in. From there, select the “Brand” or “Product” tab and then search by brand or product name.
